

heroal Surface Coating

Sustainable, high-quality, fade-resistant: quality for the highest of demands

 **ULTRA-LITE**
shutters

An attractive look that lasts

Fade-resistant surfaces to suit every taste

With an aluminum system from heroal, you can be sure of long-term value retention. This is ensured by the high-quality finishing process for the surfaces. Regular inspections and certifications by independent testing institutes confirm this high quality standard. Depending on the production process of the product, the surface is protected by either the high-quality heroal hwr (highly weather-resistant) powder coating or the heroal 2-layer thick coating.

heroal hwr powder coating

This coating process allows for vivid colours and impressive effects. It protects long-term against corrosion – including in exceptional environmental conditions – and offers excellent colour stability, gloss retention and weather resistance. Every nuance of the wide-ranging RAL colour chart is available. You can also choose your gloss level: slightly glossy, matt, granular or brilliant shimmer.

Ultra Lite Shutters Anti Graffiti Coating

Our Anti Graffiti Coating is an environmentally safe, water based, polyurethane coating that can protect your product from unwanted defacement. A LEED Certified product that meets several environmental codes and is tried and tested to be graffiti, weather and chemical resistant. Guaranteed to maintain the long lasting quality of your products and is safe to use in all applications including health care, city infrastructure, pharmaceuticals, schools, manufacturing plants and many more! We are pleased to offer our customers a safe, clean and excellent performing product to meet any requirement.

heroal 2-layer thick coating for roller shutters

This finishing process is applied before the building components are roll-formed from aluminum profiles. The 2-layer thick coating allows for highly vivid, fade-resistant colours and particularly high abrasion and weather resistance. This quality impressed the experts at Germanischer Lloyd: they even certified heroal 2-layer thick coating for use on ships of all kinds in all waters.

The high quality of the coating has been certified by a range of institutes
